## Projects

---

### My Portfolio

Written in React, this is the showcase for my web development projects.

<https://kvnoughead.github.io/>

### News Explorer

This React app allows users to use the public NewsAPI service to search for articles and save them to their personal accounts. User authentication is implemented with an Express backend and MongoDB.

<https://kvnoughead.github.io/news-explorer-frontend/>

### Around the US

A photo album app, initially written in vanilla JS, then ported to React with an Express backend.
